DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, drawn to a method for the extraction of terpenes and/or terpenoids from natural resins or essential oils.

Group II, claim(s) 10-21, drawn to an alcohol and/or hydro-alcohol solutions wherein they contain free molecular structures of sesquiterpenes, terpenes, triterpenes.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of Groups I and II are different. The special technical feature of Group I appears to be a method for extraction of terpenes and/or terpenoids from natural resins or essential oils with polar and/or semi-polar solvents under a magnetic field influence, whereas the special technical feature of Group II appears to be an alcohol and/or hydro-alcohol solution containing free molecular structures of sesquiterpenes, terpenes and triterpenes therein. Thus, Groups I and II does not form a single inventive concept as required under PCT Rule 13.1. Further, the special technical feature of the Group II product is taught by the prior art of Timcik et al. (US 7,037,955) which discloses extraction methods of terpenes from essential oils comprising monoterpenes, sesquiterpenes, diterpenes, triterpenes and tetraterpenes and terpenoids such as alcohols, aldehydes, ketones and others therein (see column 2, lines 6-55, e.g.). Accordingly the special technical feature of Group II is not a contribution over the prior art.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP

Art Unit: 1655

§ 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
